

Login Screen

User logs in and has options to sign up or retrieve password (if they have forgotten it).

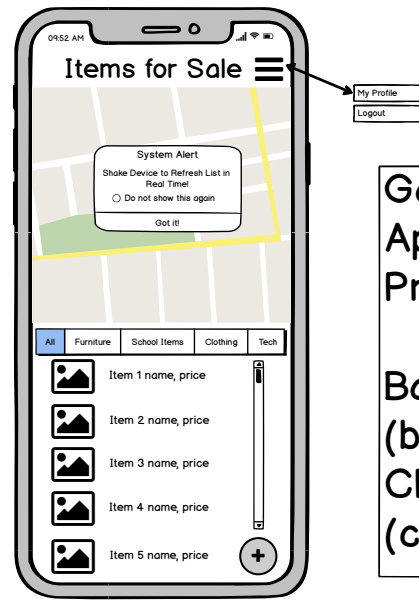

Sign Up Screen

If User clicks on "Sign Up", then this "Sign Up" form comes up. All fields are required and user will be asked for their preferred contact option (phone, email, text message, etc.).

Forgot Password Screen

If user has forgotten password, they can either use the Phone Number or Email option to retrieve it

Home Screen

Once logging in, the user will be sent to the main landing screen. There will be a map showing nearby items, along with a scrollable list which filters the map and list accordingly.

Clicking on options tab shows "My Profile" and "Logout" buttons. Logout sends user back to Login Screen.

View Item Screen

Once an item is clicked (either on the map or in the list), the item information page will show up as a modal popover screen over the main home screen. Either "X" will be pressed to exit from this screen and go back to the main "Home Screen" page or clicking outside the modal popover screen area.

Clicking on one of the "Contact Seller" options will trigger a pop-up that prompts you to select the necessary steps for that options. For example "Do you want to call XXX-XXX-XXXX?"

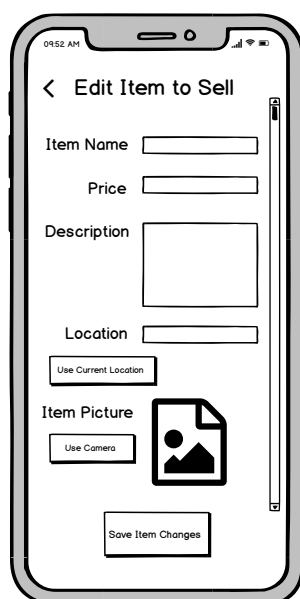

Add Item Screen

When pressing on the big "+" button at the bottom of the home screen, user will be sent to this screen (which IS a separate screen). Note that the back button here in the upper left corner sends user back to the main home screen.

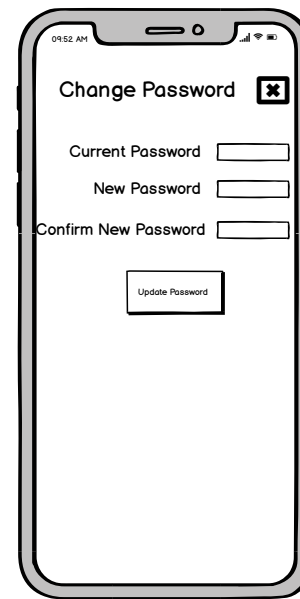

My Profile Screen

When Clicking on the "My Profile" option from Settings, the user is brought to this screen. Hitting the "back" button brings the user back to the home screen. Along with the user data from sign up, users can see the items they have for sale and edit them if necessary. Changes will be saved by clicking on "Save Changes".

Edit Item Screen

When clicking on "Edit Item" from the "My Profile" screen, User is brought to the Edit Item Screen where changes can be made to the selected user item. Clicking on "Back" here sends user back to the "My Profile" Screen.

Change Password Screen

Upon clicking on "Change Password" from the My Profile Screen, this Modal Window pop-up allows the user to change their password, and save their password settings changes. Clicking on the "X" closes the screen without saving user changes and user will now be back on the "My Profile page"
